Cameron Estates Road Conditions

Legend

Issue Number	Number of issue for that road. Each road starts at 1 and continues.
Issue Type	PH = Pothole is any size hole in asphalt which can occur anywhere in the roadway DT = Deterioration includes cracking or sinking which may lead to pothole DD = Drainage ditch issue outside the road sholder parallel to the roadway SB = Shoulder backing material to 2 feet from pavement (note any drop-off) RS = Reflector or sign deficiency (e.g. culverts, bridge, etc.) CL = Culvert clean required at inlet and/or outlet CR = Culvert repair or extension (make any notes) NOTE: driveways with issues which may impact CECSO roads should be noted and the owner notified.
Location	C = Core roadway is the area within 9' on either side of the road centerline E = Edge of road is the area between core roadway and the edge of traveled lane S = Shoulder area outside the traveled lane
Size	Length of issue in feet measured parallel to (along) the roadway Width of issue in feet transverse to (across) the roadway Size in square feet (computed)
Priority	H = High priority issues that need repair within 1 year M = Medium priority issues that will need repair between 1 to 2 years L = Low priority issues that may need repair in 2 years or more
Notes	Create a paper worksheet for each road. Each road will have a tab in spreadsheet.
